Immunization	Date (Age)	Exemption Dosage	Administered at School	Immunization is Valid	Source Comments
-	8/9/2018	- Age Conscientious Medical Immunity	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

*Allowable date formats: mm/dd/yyyy, mm/yyyy, yyyy.

Exemptions

- ▶ Exemptions are entered on the Edit Student Immunizations page
 - ▶ Enter one exemption record for each immunization group, e.g. MMR, Polio, etc. as appropriate
 - ▶ Can have mix of immunization records and exemptions for a student
- 

Importing Immunization Records

Downloads available by student from
Immunization Information Systems (IIS)

IIS's are state-specific

Iowa – IRIS (already importable into JMC)

Minnesota – MIIC (already importable into JMC)

Wisconsin – WIR (projected soon)(pilot?)

Nebraska – NESIIS (projected soon)(pilot?)

Need to Send Series of Files (Requests) and
eventually get a file of immunization records to
import directly into JMC

Importing Immunization Records Example MINNESOTA

Export/Upload MIIC List File

Export/Upload MIIC Client Query File

Download/Import MIIC Immunizations

Detailed instructions right on each page, including
MIIC links

MIIC Import

MN High School

Day: 1 - 09/04/2018 - Tuesday

2018-2019

This option allows you to import immunization data that was exported from your MIIC account at:

<http://www.health.state.mn.us/divs/idepc/immunize/registry/>

The Client Extract and Immunization Extract files may be obtained from MIIC by first submitting a List file and then submitting a Client Query file.

Please contact your regional MIIC coordinator for more information about uploading & downloading flat files with their web application.

Upon successfully submitting the List and Client Query files to your MIIC account you should have 2 files to download: a Demographic (Client Extract) file and an Immunization (Immunizations Extract) File.

You will need both files in order to import the immunization data.

Please make sure the Demographic and Immunizations files are downloaded as text files and NOT as web archive or .mhtml files.

Please select each file independently below before clicking the Start Import button.

Demographic (Client Extract) file to import:

No file chosen

Immunization (Immunizations Extract) file to import:

No file chosen

Store Provider Name as Comment

Importing Immunization Records Example IOWA

Export/Upload IRIS Patient File
Export/Upload IRIS Query File
Download/Import IRIS Immunizations

Detailed instructions right on each page, including
IRIS Contact Information

IRIS Import

Import Immunizations Registry Information System (IRIS) file.

These files may be obtained from IDPH by first submitting an Inbound Query File. In the JMC Next Gen Application, you may create such a file by selecting Health-Data-Export IRIS Query File and then uploading this file to the IRIS website.

Please contact IRIS support at IDPH at 800-374-3958 for more information about working with IRIS immunization data files.

Once your request has been processed by IRIS, you should have 2 files available to download: an Outbound Demographic File and an Outbound Immunization File. You will need both files in order to import the immunization data.

Please select each file independently below before clicking the Start Import button.

Outbound Demographic File to import:

Choose File No file chosen

Outbound Immunization File to import:

Choose File No file chosen

Start Import

IIS vs. JMC Immunization Submodule

Some Schools Choose to use only their IIS and not put any immunization data into JMC

IIS's have:

- Student Records
- Compliance Reports

If only use IIS then will not have immunization records in JMC's Print Health Records or Print Transcripts option

May have immunizations in JMC that are not in the IIS, example student transfers from another state

If use both then can compare compliance results

Resources

- ▶ Documentation Updates
 - ▶ Health Professionals Page
 - ▶ <http://jmcinc.com/index.php/health>
 - ▶ Includes PowerPoints, Documentation
 - ▶ Instructional Videos
 - ▶ Today's Webinars Will Be Posted
 - ▶ Sign up for free web-based training
 - ▶ All resources will be updated on ongoing basis

JMC NEWS FOR HEALTH PROFESSIONALS

JMC will be holding its first ever Health Webinar series on Monday August 13, 2018.

The webinar series will include sessions for each Health submodule, such as medication log, visit log, etc. as well as an overview session to show how to use the Health module in general and how it relates to other applications in the JMC suite such as Online Teacher. You may attend one or all sessions or anywhere in between. Simply look at the agenda and decide which session(s) you wish to attend, then come and go throughout the day as you wish. These sessions will be recorded and later released as a series of JMC Health module training videos. Some sessions may include PowerPoint presentations, which would be posted on this page soon after August 13.

Here is the [link for the webinar\(s\) sign-up and agenda.](#)

OVERVIEW

The Health Module is school nurse software that ties together all of your school's health needs. This computerized health program allows you to easily manage, update, and query your students' health records. The health module allows you to see up-to-date parent contact information, health history, office visit logs, student medication logs, student medical emergency plans, and immunizations. In addition, parents can review their student's conditions, medicines and insurance in Student Information Forms. These forms are easily created in the Attendance module. The student's health information is stored in five categories:

News

JMC is has the medication log and medical emergency plan ready for use in the Health module.
